9.00 OP

1. (Amended) A hydrogel composition comprising a hydrogel polymer prepared using an excess amount of cross-linker having two or more functional groups capable of cross-linking the polymer such that the polymer has cross-links to other hydrogel polymer molecules and also has dangling cross-linkers with at least one functional group bound to a hydrogel polymer and at least one unbound functional group capable of reversibly cross-linking the polymer, wherein the amount of dangling cross-linkers, based on the total
